### STEP:1 STEAM GENERATOR SETUP

The steam generator should not be installed in the steam room. Install in a dry place where the ventilation is good.

Both sides and the top of the steam generator need to reserve at least 12 inches space.

The installation area must be convenient for the steam generator draining system.

### STEP:2 PLUMBING INSTALLATION

The drawing is only for explanation purposes.

1. Use unions when connecting pipes.
2. Use brass pipes or copper hoses only.
3. Do not use black/galvanized/PVC pipes.

### STEP:3 INSTALLATION OF STEAM OUTLET

The pipes, its accessories and the holes should be air proof by applying glue so that no steam will enter the holes in the wall.

### STEP:4 POWER ASSEMBLY

Do not connect electric current directly to heating elements

This graph is for explanation only. For actual installation, refer to national and local electricity consumption codes by professional electricians

### STEP:5 STEAM GENERATOR INTERNAL SETUP

1. ENCLOSURE
2. INSULATION BRACKET
3. CIRCUIT BOARD
4. STEAM OUTLET
5. PRESSURE RELIEF VALVE
6. WATER FILL VALVE
7. WATER DRAIN VALVE
8. SUBSIDIARY WATER TANK
9. MAIN WATER TANK
10. HEATING ELEMENT
11. 221 F HI-LIMIT
12. TRANSFORMER
13. TERMINAL BLOCK
14. FUSE
15. GROUND WIRE CONNECTOR
16. RELAY
17. WATER LEVEL SENSOR

### STEP:6 PANEL INSTALLATION ON WALL

1. 4-5 feet from the ground.
2. Away from the steam head and do not expose under the direct spray of steam.
3. Install in the perpendicular wall.
4. The position of installation should facilitate easy operation and convenient wiring

### SAFETY AND USER MANUAL

1. The steam head is hot. DO NOT touch the steam head and avoid the steam near the steam head.
2. Excessive temperatures have a high potential for causing fetal damage during the early months of pregnancy. Pregnancy or possibly pregnant women should consult a physician regarding correct exposure.
3. Obese persons and persons with a history of heart disease, low or high blood pressure, circulatory system problems, or diabetes should consult a physician before using a steam bath.
4. Prolonged use of the steam system can raise excessively the internal human body temperature and impair the body's ability to regulate its internal temperature (hypothermia). Limit your use of steam to 10-15 minutes until you are certain of your body's reaction.
5. Use only mild soap and water on a soft cloth to clean the control and steam head. DO NOT use abrasive cleansers.
6. Persons using medication should consult a physician before using a steam bath since some medication may induce drowsiness while other medications may affect heart rate, blood pressure and circulation.

- **How it works:** Cold water piped into a steam generator is heated to the boiling point and then sends fresh steam to an aperture in the shower stall. Digital controls inside the shower let the user adjust the steam's temperature and duration and can even add piped-in aromas, lighting, and music.
